

Smith, 1631.
A new Almanacke and
Prognostication for the
yeere of our Redemp-
tion. 1631. 5320

Being the third from the Bisse-
tile, or Leape yeere. 18.
Calculated for the Meridian
of the ancient Towne or
Borough of *Worcester* in
Worster-shire.

And may serve without sensible
error, for the most parts of
Creat Britaine.

By *John Smith*, Wel-willer to
the Mathematicks.

LONDON,
Printed for the Company of
Stationers.

Vulgar Notes.

Our English
account.

Septuagesima bids thee stay } till } eight daies after easter day
Rogation also doth deny } Sunday comes call'd trinity

To the Reader.

THe Country men who till their land with paine,
Of vnkind seasons oftentimes complaine,
Sometimes they grudge, and say that too much wet
Their Haruest marres, and all their worke doth let:
Another while they murtheringly reſtaine
To plow and ſow, and all for lacke of raine:
Again they cry through ſnow, and haile, and froſt,
They doubt their Cattell will be many loſt,
And euery yeere they thinke the Proverbe's true,
Bad was the old, but worſer is the new.
But if you'l giue me leaue to ſpeake, Ile tell
You how all this, and more for to repell.
Leaue off to ſin, your graſſe full well ſhall grow,
And times ſhall ſerue to ſow, and reape, and mow:
Your Cattell ſhall encrease and multiply,
And all things ſhall goe well: for certainly
“A fruitfull Land made barren by the ſin
“Of the Inhabitants that dwell therein.
Therefore (in time of wet) if you will ceaſe
To powre out ſin, and with God make your peace,
The ſhowres ſhall ſtay, or if ſo be through lacke
Of raine, the hungry earth ſhall rend and cracke,
If ſloods of teares to God you will ſend out,
Sweet dewes of raine he'll ſend you without doubt.
Or if froſts make your land as hard as ſteele,
Whsreby your Cattle ſhall much hardſhip feelee:
If you from off the dregges of ſin will thaw,
And of your Maker will but ſtand in awe,
In ſtead of froſt ſhall pleaſant weather be,
And all things ſhall well with your minds agree.
Now, gentle Reader, whether farre or neere,
Farewell vntill the next enſuing yeere.

Your aſſured friend

John Smith.

Note that the Epact changeth the first of March,
And the Golden number the first of Ianuary.

March hath xxxi. dayes.

Now humours ill begin to spring,
And baths are good, and blood letting,
Or Pills, or Potions, maist thou take,
Thy breach of Nature vp to make.

August hath xxvi. dayes.

Sleepe not at noone cate not too much,
For feare lest surfers should thee grutch,
And now whiles Luna blunts her horne,
Ceres lacks men to reape her corne.

Sun riseth
at Euclat.

Smith. 1631.

A Description of the Foure quarters of the yeare.

Winter ☉ in ♊. ♋. ♌.

VVInter Quarter Astronomically began the last yeare 1630. vpon the 11 day of December, at 31 minutes past 11 at night, at which time the Sonne entred in the first minute of the Equinoctiall tropicall signe Capricornus: And doth continue vntill Thursday the 10 day of March this yeare 1631. In which time the eye of the world, the Sonne maketh his progression through these 3 decrepid signes, Capricorne, Aquarius, and Pisces.

This quarter is by nature moyst and cold,
And is compared to a man that's old

Spring, ☉ in ♈. ♉. ♊.

The Vernall or Spring quarter taketh his beginning vpon the 10 day of March, being Thursday, at 6 a clocke at night, at which time the Sun entreth into the first minute of the Vernal Equinoctiall signe Aries, making the dayes and nights of equall length throughout the whole world, and produceth (to vs that liue vnder the North side of the Equi

A Prognostication.

Equinotiall) the comfoꝛtableſt and pleaſan-
teſt quarter of all the yeare : being the fitteſt
time to uſe the helpe of Whiſſicke, and Phle-
botomie, to remoue ſickneſſes oꝛ diſeaſes,
whiċh haue continued long. This quarter con-
tinueth vntill Saterday the 11 of Iune, in
whiċh time the Sun paſſeth through through
theſe three ſignes, Aries, Taurus, Gemeni.

This quarter is by nature moyſt and hot, o
Like to an infant, that ere while was not.

Summer, ☉ in ♈, ♉, ♊.

The Eſtiuall oꝛ Summer quarter, taketh
his beginning vpon Satterday the 11 of
Iune, three minnts after 9 at night, at whiċh
time the Sonne is mounted as nere as he can
to our Zenith, and hath taken entrance into
firſt minute of the Eſtiuall ſolliſticall ſigne
Cancer, producing to vs the longeſt day and
ſhoꝛteſt night : it continueth vntill Wedneſ-
day the 13 of September. In whiċh ſpace the
Sonne paſſeth towards the Equinotiall, tho-
rough theſe three ſignes, Cancer, Leo, Virgo.

This quarter is by nature hot and dry,

Like a yong man, whoſe blood with heate
(doth fry.

Autumne ☉ in ♋, ♌, ♍.

The Autummall quarter oꝛ fall of the leaſe
(as it is vulgarle called) beginneth vpon
Satterday

Smith. 1631.

Saturday the 13 of September, 39 minutes after high none, at which time the Sunne entereth into the first minute of the Autumnall equinoctia l signe Libra, making againe an equall vicissitude of day and night: It lasteth untill the 12 of December next, in which time the Sun passeth through these 3 signes Libra, Scorpio, S gitarius.

This quarter is by nature cold and drie,
Like middle age, which to grow old doth hie

Of Eclipses this yeare 1631.

Four times this yeare shall the two great Luminaries of Heauen, viz. the Sunne, and Moone be Eclipsed or suffer losse of light.

The first Eclipse will be of the Sun, vpon the 21 day of Aprill 9 minutes after 9 of the clocke in the morning: hee will bee darkened vnto the quantitie of 4 digitts, by reason of the Moones south Latitude, it will not bee visible in our horizon: but it will be conspicuous to the Inhabitants in the Straights of Magellanica, and vnder the Meridian of Cambaie, in the kingdome of Asia.

The second Eclipse will be of the Moone, vpon the 5 day of May, at 7 at night.

The beginning at 5. ho. 12. mi. afternone.

The midst of darkenesse at 7. ho. 2. mi.

The

A Prognostication.

The end of the Eclipse will be at almost 9

The totall duration 3. ho. 39. mi. 54. sec.

The diget 502 parts eclipsed 21--31' 57"

Where in England shall not see the begining of this Eclipse, for the Mone will not be risen, nor the S. nne set, untill 12 mi. after 7. at which time there will bee somewhat the middle of true opposition.

The third Eclipse will be of the Sun, upon the 15 of October, at 5. and 24 min. 40 sec. in the morning, and will be visible in our horizon, but be seene apparently unto those that inhabit in the uttermost parts of Asia, toward the east, in the country of Cathaia, and the mountaines of Belgia, under the great Cham, and in the regions adjoining thereto, &c.

The fourth Eclipse will bee of the Mone, upon the 29 of October at 11 at night.

The beginning of darkenesse at 8 ho. 40. mi.

The midst of darkenesse at 11.

The end of the Eclipse at 1.

The totall duration of this Eclipse from the begining to the end, will be 4 ho. 17' 6"

The eclipsed parts of digitts 19-48' - 45"

¶ The time of Change, Fulls, and quarters of the Moone ; and an Abstract for each Moneth.

January.

Full Moone 8 day at 5 in the morning.

Last quar. the 14 day 28 min. after 11. at ni.

New Moone the 22. day 22 m. past 6. mor.

Last quar. the 30 day, 46 m. past 9 at night.

The Abstract.

The mould from off your fruit tree roots vpreare,
and prune and dresse them, they more fruit will beare,

Cut downe your timber, houses for to build;
now turne your gardens, more fruit will yeld.

When summer comes, and now tis not to soon,
to geld for rearing; but obserue the Moone.

February.

Full Moone the 6 day 54 mi. past 4 at night

Last quar. the 13 day 41 min. past 8 in the m.

New moone the 20 day, 22 m. past 11 at night.

The Abstract.

Now is the time to sow your beanes and pease;
or faster hearbs, in gardens if you please.

Good husbands also in the field doe walke,
with paddle for to breake the water balke.

Which marrs the corne, and yet tis good to plant,
quicksets, and roses, if so be you want.

March.

First quar. the 1 day, 56 mi. after 3 in the m.

Full

A Prognostication.

Full moone the 8 day, 40 m. after 2 in the mo:

Last quar. the 14 day, at 7 a clocke at night.

New moone the 22 day, 24 mi. past 4 at ni.

First quarter the 30 day, at 6 at night.

The Abstract.

The roots of trees you heere tofore made bare;

to couer or'e with mould, now haue a care:

'Tis good to plant, both apple, plum, and peare,

and land for barley, with your plow to teare.

Sow pease, beanes, oates, cowcumpers, mellens, sage,

artichokes, parsnips, onions, for this age.

Aprill.

Full moone the 6 day, 10 m. past 11 in the m.

Last quar. the 13 day, 47 m. past 6 in the mo:

New moone the 21 day, at 9 in the morning.

First quar. the 29 day, 6 m. past 4 in the mo:

The Abstract.

Sow barley now in land that's strong in heart,

Flaxe seed, and hempe, vnto your impart;

Set garden hearbs, and harken to your bees;

this moneth and the next, let tanners barke their trees.

May.

Full moone the 5 day, 7 mi. past 7 at night.

Last quar. the 12 day, 23 mi. past 8 at night

New moone the 21 day, 38 m. before 1 mo:

First quar. the 28 day, 13 mi. past 11 before

noone

The

Smith. 1631

The Abstract.

Now is the time to stirre for Wheat and Rie,
and sow such hearbs as frost would cause to die.
As mari oram, and basil, sauiory, time,
for setting hearbs, tis counted now the prime.

June.

Full moone the 4 day 14 m. past 3 in the moz
Last quarter the 11 day, at none al nost.
New moone the 19 day, 37 m. past 1 afterno.
First q. the 26 day, 32 mi. past 4 afternone.

The Abstract.

Fetch home your fuel, & aile beginne to mow,
set gillow flowers, and lettrise seede, yet sow
Rose, and hearbs, within this moneth distill:
and weede your corne, and sheare sheepe if you will.

July.

Full moone the 3 day, at a little past high none
Last quarter the 11 day, at 5 in the morning.
New moone the 19 day, at 1 in the morning.
First qu. the 25 day, 35 min. past 9 at night.

The Abstract.

The choyest hearbe that thou canst pick and cull,
gather and dry i'th shade, the moone at full:
Take heed: of sunne heate and colds for they,
will quickly bring the body to decay.
Good husbands now doe labour with the Ant,
'gainst winter comes who'e liuery is want.

August.

Full

A Prognostication.

Full moone the first day, at 10 at night.

Last quarter the 9 day, at 10 at night.

New moone the 17 day, at 35 min. past 10 before noone.

First quar, 23 day, 34 m. past 3 in the mo2.

Full moone the last day, 14 min. past noone.

The Abstract.

Make hast and rid your meadowes now of hay,

least Neptune come, and sweepe it all away:

Reape Wheat and Rie, and stirre your land for Wheate,
those that are idle now, let them not eate.

September.

Last quar: the 8 day 8 min. past 5 at night.

New moone the 15 day, 46 m. after 7 at nig.

First quar: the 22 day, 36 m. before noone.

Full moone the last day, 22 min. past 4 in the morning.

The Abstract.

Is hauest ripe? toget it in be bold;

sow wheat, and rie, in land that's strong and cold:

Crabbs, Apples, Peares to gather, be not wearie,
they'll yeeld these liquors, veriaice, cider, peary.

October.

Last quar. the 8 day, at 9 before noone almost

New moone the 15 day, 10 min. past 5 mo2.

First quar: 21 day, 25 mi: after 10 at night.

Full moone 29 day, 51 mi. past 10 at night.

The

Smith. 1631.

The Abstract.

Sow wheat and rie, the weather being faire,
the Moone increasing in a pleasant ayre;
Remoue yong trees, as plum and pare, and apple,
rose, baytree, filberd, oke, e/me, ash, and maple.
Gather your winter fruit, to keepe in store,
The prouerb still is true, store is no fore.

November.

Last qu: the 6 day, 19 min: past 10 at night.
Peto the moone 13 day, 14 min: past 3 after
noone.

First qu: the 13 day, 6 mi: past 1 after noone
Full moone the 21 day 7 mi: past 6 at night.

The Abstract.

The roots of Apple trees, this moneth vncover,
so let them rest till March, then spread earth ouer:
Set crabtree stocke, remoue trees as before,
in the last Moneth; and now make malt for store.

December.

Last quarter the 6 day, at 10 before noone.
Peto the 13 day, 11 mi: after 2 in the moz.
First q: the 20 day 41 mi: past 7 in the moz.
Full moone the 28 day 21 min: past noone.

The Abstract.

Timber to build this moneth t'is good to fall,
to following land, for barly time doth call.
(The weather not to hard) sow beanes & pease,
Apple tree roots vncover, if you pleate;
Good diet, let thy chiefest phisicke be,
inuite the poore to dine, & sup, with thee.

To

¶ To know what a clocke it is, in the
day time, by your hand.

TO find how th'day doth passe away
byth' lines in the left hand;
I'll shew a way how that you may
it quickly vnderstand.

In winter time your hand hold plaine
turne to the Sunne, your face

But in the winter time againe
your backe the same way place,

Vntill the muscle of the thumbe
doth giue a shaddow rise,

That you may see it euen come
vntill the time of life.

The index of this diall is,
a rush or any spray :

The length whereof doth neuer misse,
of the fore finger aye.

Which must be placed in such sort,
'twixt forefinger and thumbe :

It must not leane, nor be too short,
but vpright as a plumbe.

The places which the houres shew,
in briebe I will declare :

Fore fingers end full well I know,
makes 5 and 7 bare.

Both 6 and 6 long fingers end,
doth very plainly tell :

And

Smith. 1631.

And 7 and 5 ring fingers end,
doth shew you very well.
And 8 and 4 care fingers end,
doth shew you to a poynt :
And 9 and three their time doth spend;
on th'same fingers first ioynt.
The second ioynt assuredly,
both 10 and 2 doth claime ;
To th'third 11 and 1 doe hie;
to ~~shew~~ that time certaine.
And 12 to chuse his place is bold;
on th'line of generation :
Thus euery houre his place doth hold;
by th'index true relation.

*To know what a clocke it is in the night by the
moone. shining upon a Sundial, and to know how
long she shineeth, and when she riseth and setteth,
by the Table following.*

Seeke the Moones age in the fourth col/
lumbe of the Ballender, with which
number enter this Table, under the title,
The Moones age for Southing, answering
to

A Prognostication.

The moones age for Sou- thing.	The moones comming to South.	The age for shi- ning.	The C
day. ●	day 12	o daies.	daies
1	16 12	48 1	29
2	17 1	36 2	28
3	18 2	24 3	27
4	19 3	12 4	26
5	20 4	0 5	25
6	21 4	48 6	24
7	22 5	36 7	23
8	23 6	24 8	22
9	24 7	12 9	21
10	25 8	0 10	20
11	26 8	48 11	19
12	27 9	36 12	18
13	28 10	24 13	17
14	29 11	12 14	16
15	30 12	0 15	15
da. ●	da. o.	mi. da.	da.

to which un-
der the title:
The Moone
comming to
South, you
haue y^e houre
and minute
of southing,
and note that
all the in-
crease thee
commeth to
South after
noone, and
all the de-
crease, thee
commeth to
south in the

morning.

Now to know what a clock it is vpon a sun-
diall, & see what a clocke it is by the shadowe
of the moone, noting how much it wanteth or
is past 12 of the clocke, for so much it want-
teth, or is past the houre of her comming to
south that night.

Example.

Upon the first day of January at night you
would know the houre of the night, and look-
ing in the fourth collame of the kalender, you
find

find the Moone to be 9 dayes old, with which number entring this Table, under the title The moones age for southing, you finde the moone cometh to south at 7 a clocke and 12 minuts, and looking vpon a sundiall, the shade falleth vpon 2 a clocke afternone, which is 2 houres past 12, therefore 2 hou. past 7 a clocke and 12 minuts, viz. 12 min. past 9.

Now to find how long the Moone shineth, and when she riseth and setteth, thus doe; find the age of the moone vnder the tile The Cage for shining, then answering thereunto, shall you see the houres and minuts of her shining in the euening, and after the full she shineth before the Sun riseth in the morning, so many houres as the table sheweth, and for the rising and setting thus doe, whiles the moone increaseth add to the quantity of her shining the houre of Sun rising, so haue you her rising, the same quantatie add to the time of sun setting, so also haue you her setting.

But after her full take the quantity of her shining from the sun rising, and you haue her rising: the same also take from sun setting, sheweth the time of her setting, and if subtraction cannot be made, borrow 12.

Example

A Prognostication.

Example.

The first day of January the moone is 9 daies old, wherewith entring the table vnder the title, The moones age for shining: you finde answering thereunto 7 houres 12 minuts, which sheweth that the moone shineth that night after sunne set 7 12 minutes, and the sunne riseth the same day 4 minutes after 8 a clocke, which added to 7 houres 12 minutes, maketh 15 houres 16 min. from whence substract 12 (which is none) and there remaineth 3 houres 16 min. which sheweth that the moone shall rise that day 16 min past 3 in the afternone, and the same day the sunne setteth at 3 a clocke and 56 min. which added to 7 hon. 12 min. maketh 11 hou. 12 min. which sheweth that the Moone will set that night at 12 min. past 11 a clocke.

C

The

The Geographically description of
waies from one notable Towne to another,
ouer all England, and thereby how to trauele
from any of them to the Citty of Lon-
don: set forth by a new
order,

Note that the figures in the rowes vnder this mark,
* is the distance off that Towne they stand against,
from London, or from the Towne you are directed vnto,

From Yorke to London, is 150. Miles.
